

Voies Accessoires de Localisation Inhabituelles

Nadir SAOUDI
Monaco

Mrs Tas.. L.

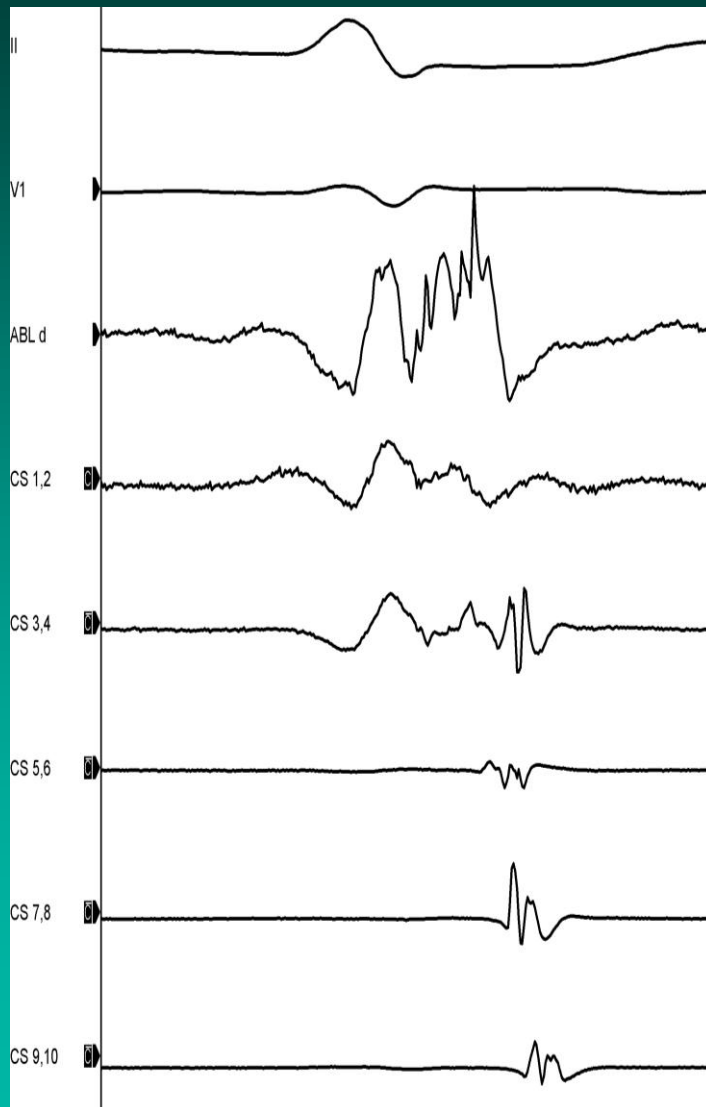

64 y

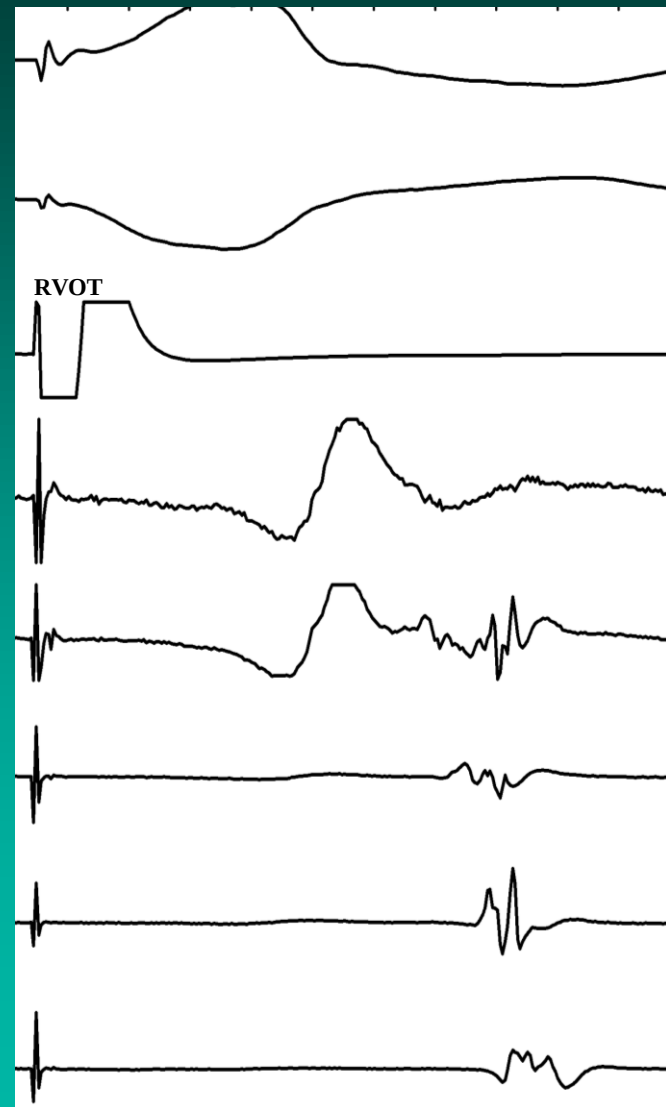

- Palpitations since the age of 18
- No SHD
- Recent documentation of narrow QRS tachycardia
- July 10: Difficult RFCA of concealed left Posterior AP in another center
- Palpitation recurrences despite Flecainide 200 mg/d

LPLAP

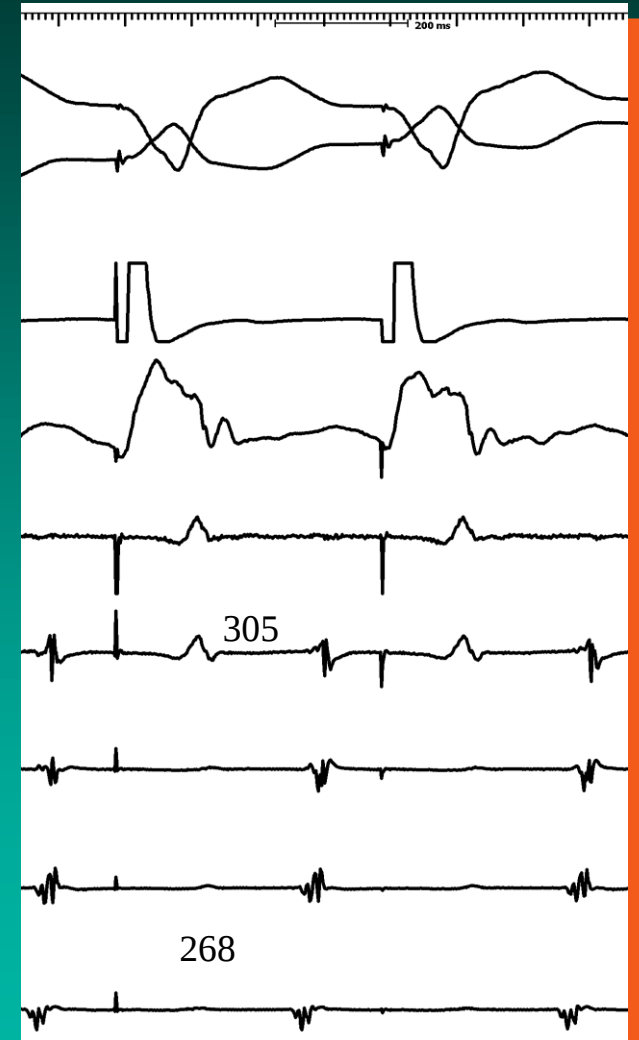

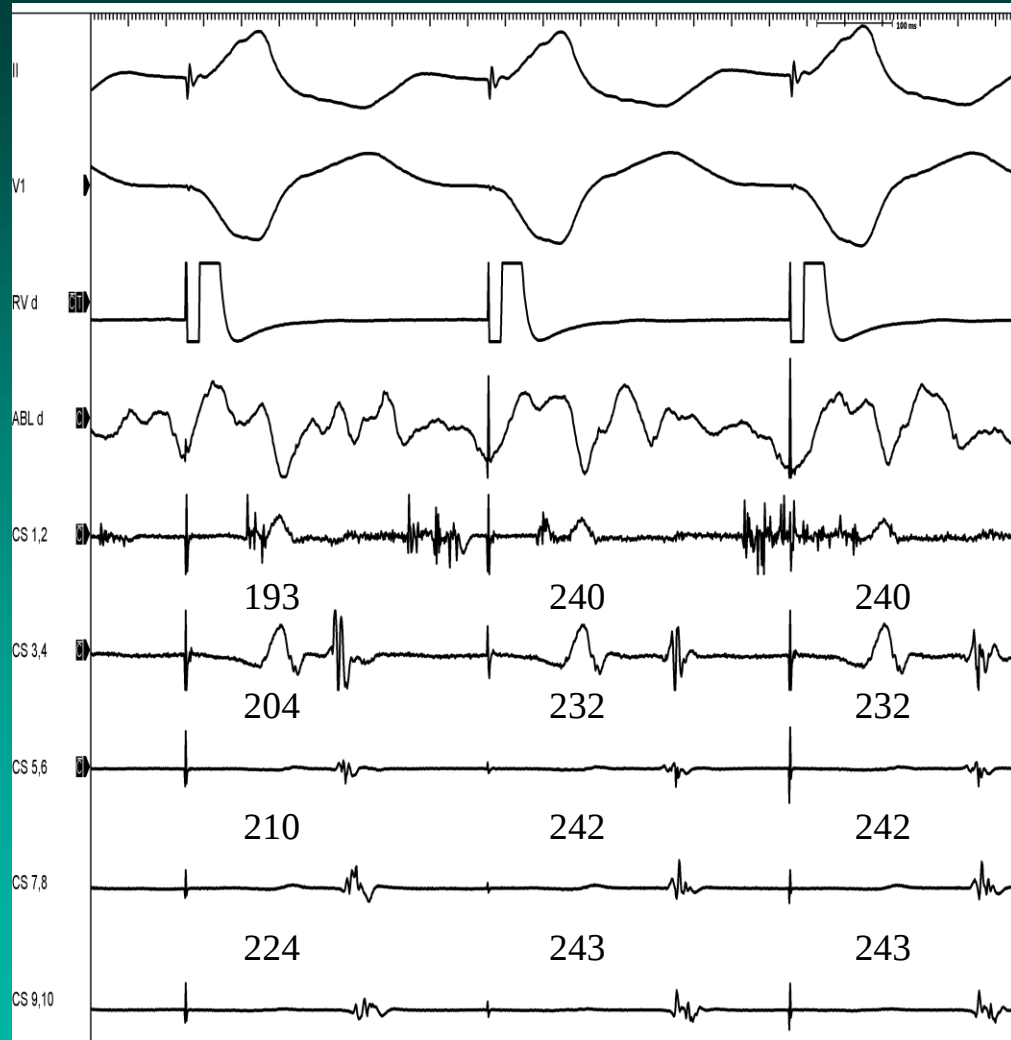

- During SVT

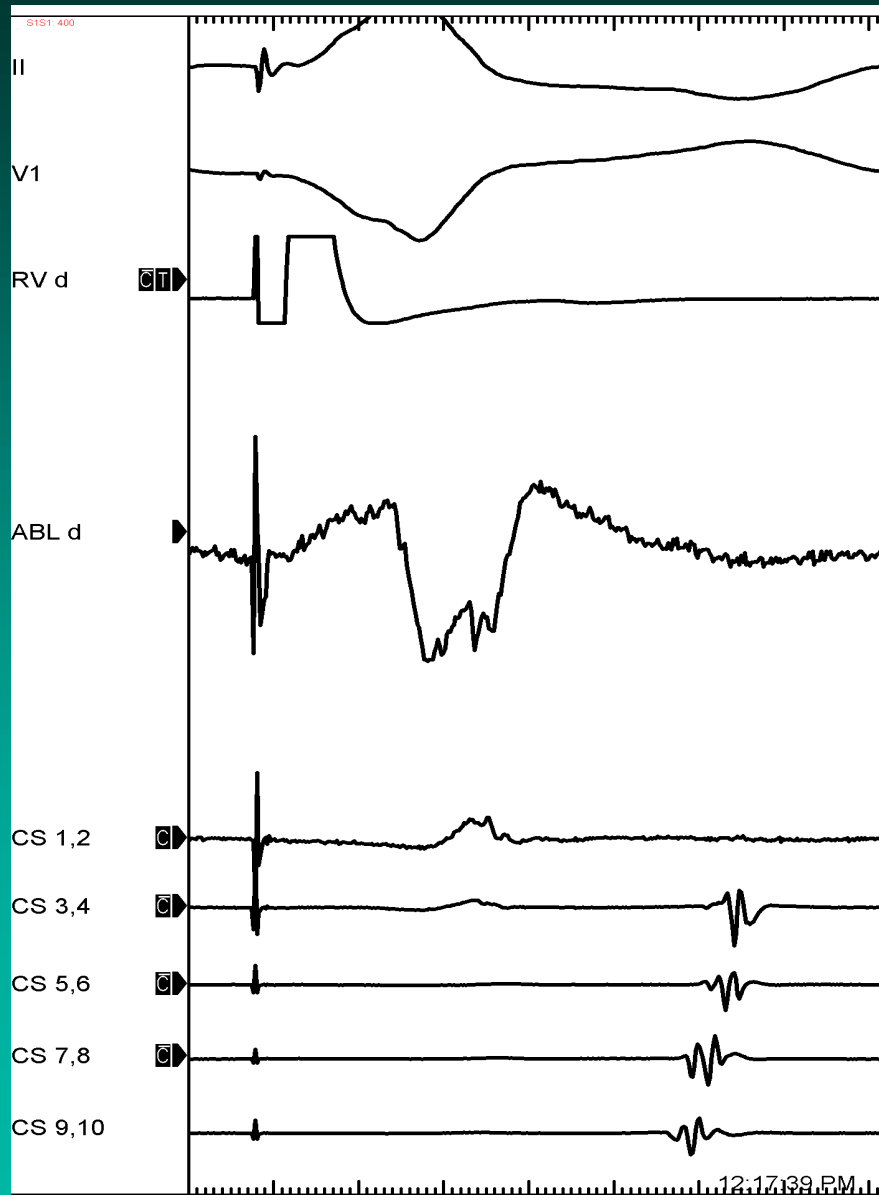

- During RV pacing

During Rf - Emergence of a Centrifugal Activation Pattern within the CS

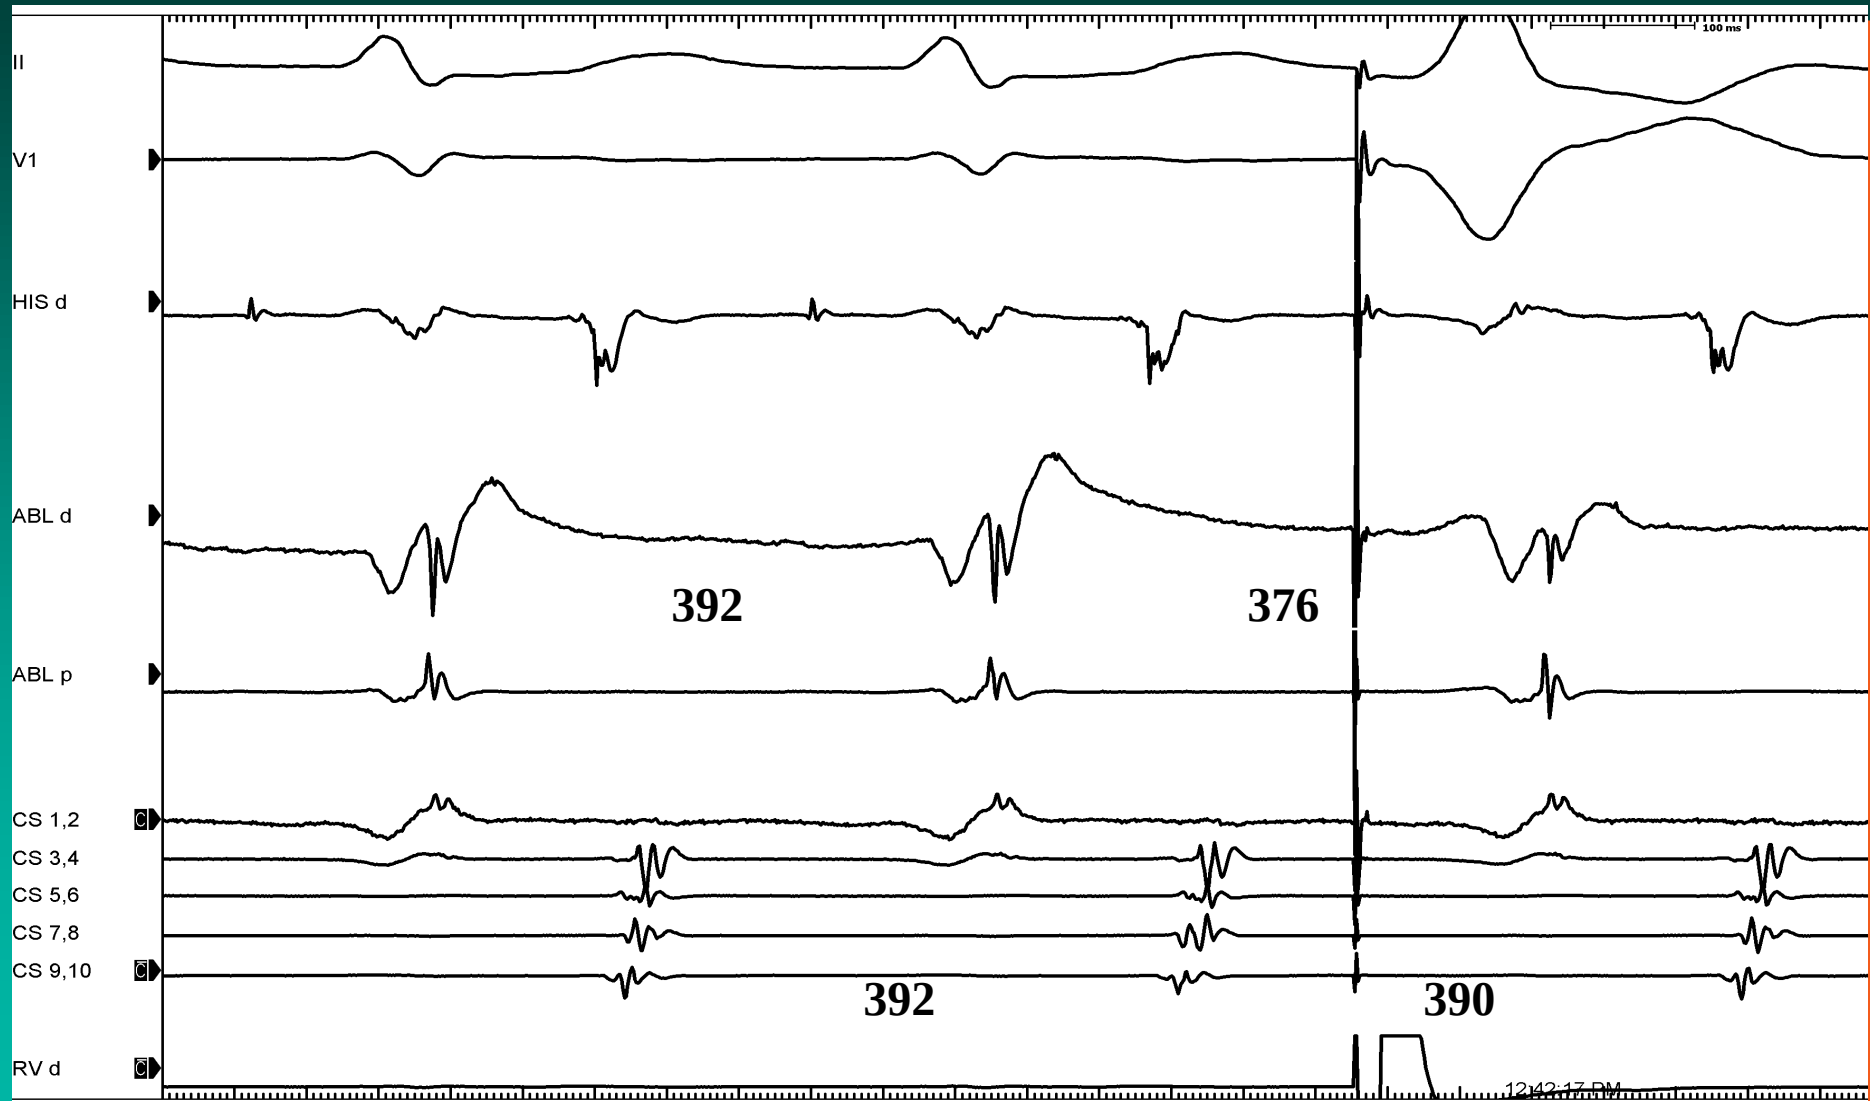

Après le tir

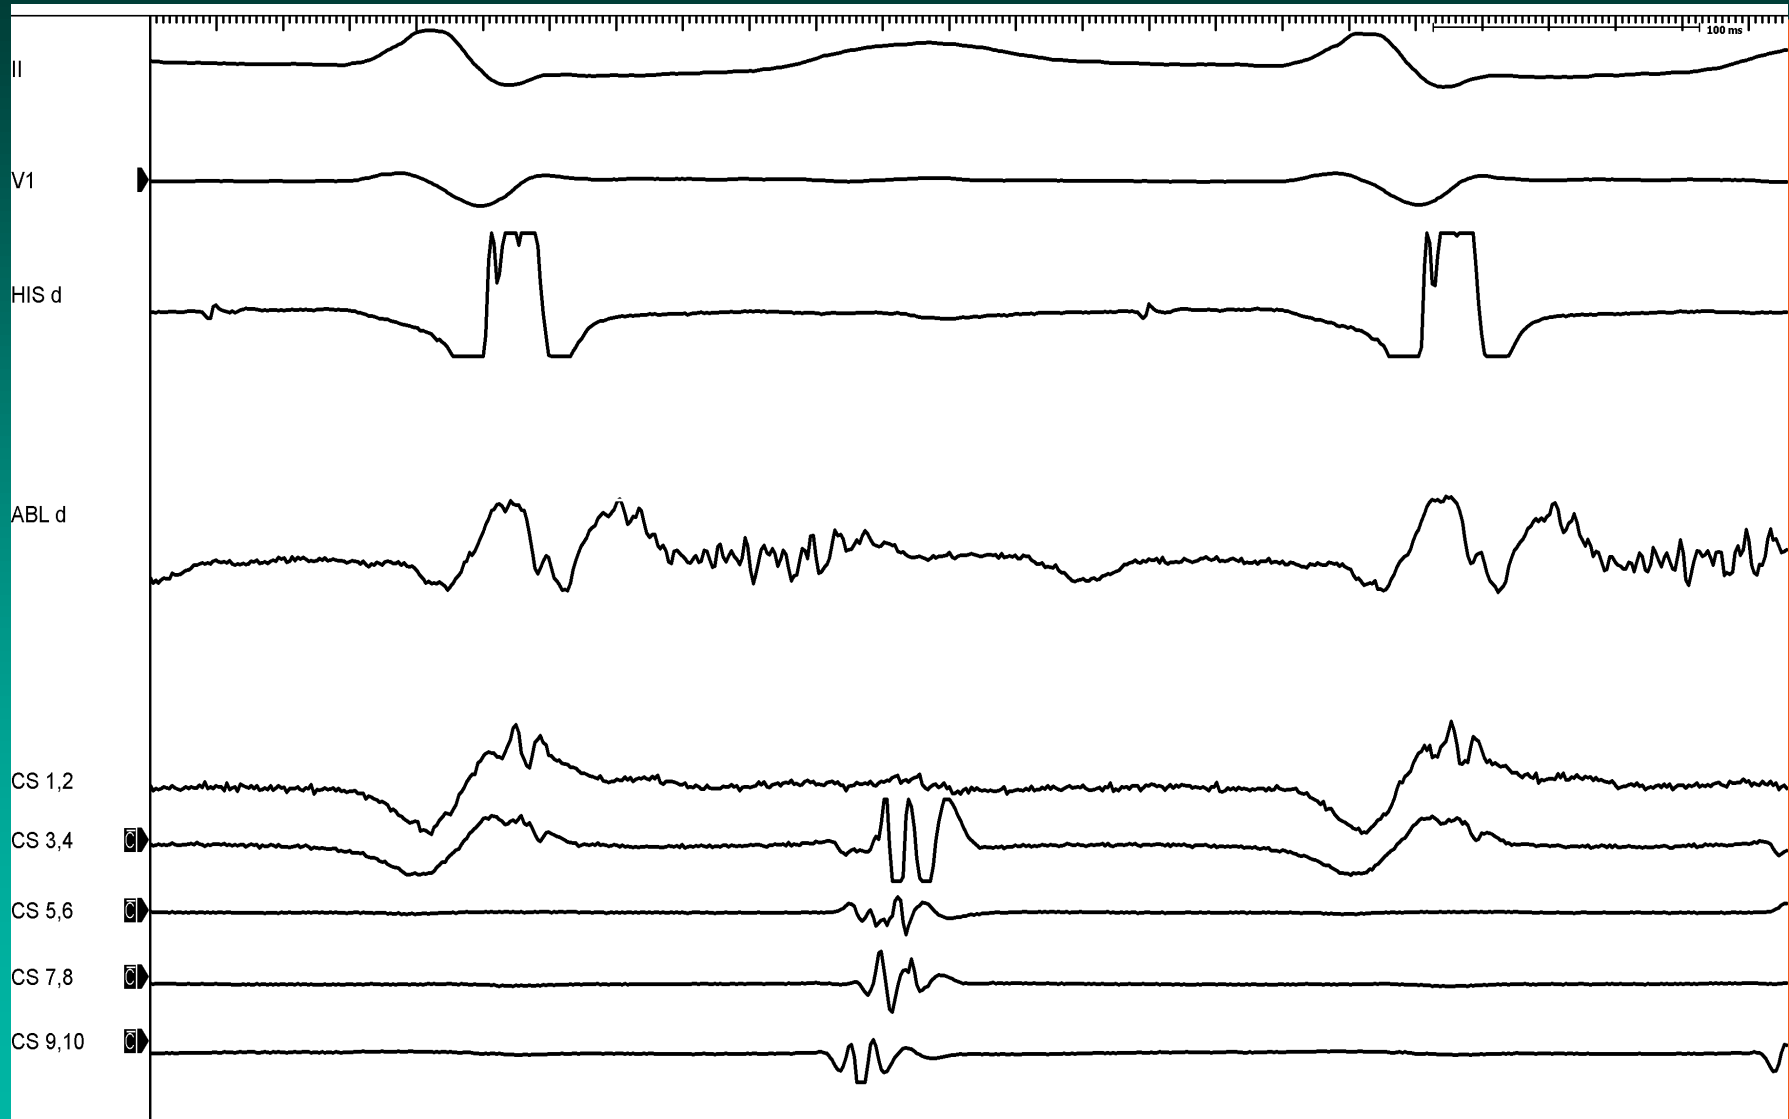

- 1 – Bravo ! C'est gagné: Il n'y a plus de VA.
- 2 – Ca ne me convainc qu'à moitié ! essayons de redéclencher
- 3 – C'est pas juste: on comprends jamais rien dans ce type de présentation !
- 4 – Je donne ma langue au chat
- 5 – Qu'est ce qu'on a raté à la télé ce soir ?

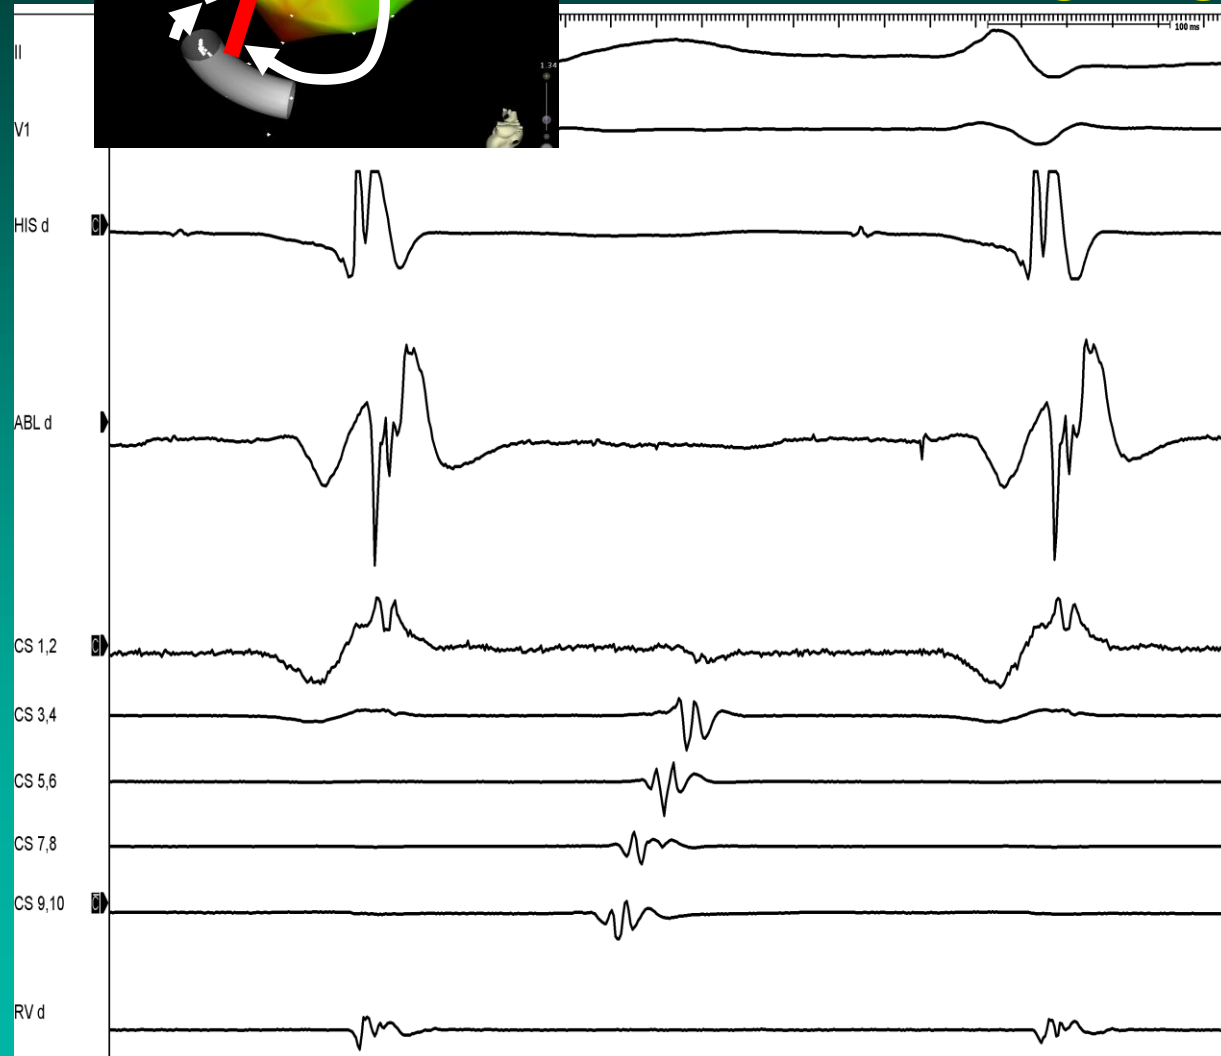

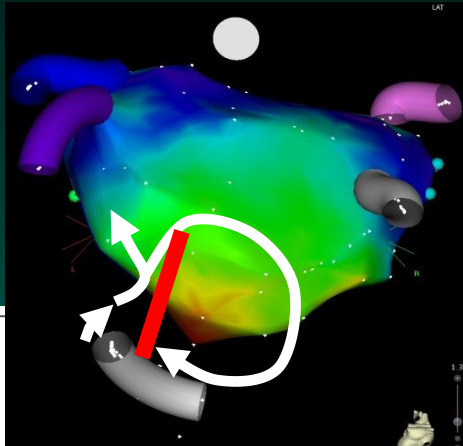

TJ toujours inductible avec activation centrifuge du SC et DS

ABL d plus latéral que SC12

Pot cible sur le tir efficace

Intra-Atrial Block Along the Mitral Valve Annulus During AP Ablation: Evidence for a Left Atrial « Isthmus »

- Intra-A conduction block (sudden change in retrograde LA activation sequence despite persistent and unaffected pathway conduction) following RF delivery in 11/159 LLAP cases (6.9%)
 - In six pts, reversal of A excitation during ORT falsely suggested the presence of another (septal)AP
